# Linen Sizing Chart

## Notes on Table Drapes

All table drapes have rounded corners so they hang nicely at the four corners  
The seam on the linen will run the length of the table

## To determine correct size of linen for Round Tables:

Subtract table diameter (in inches) from linen diameter (e.g.  $118" - 60" = 58"$ )

Divide that number by 2 ( $58" / 2 = 29"$ )

The answer gives you the drop that cloth will have on the table: 29"

Tip: most tables at sit-down height are 30" high

## To determine correct size of linen for Rectangular Tables:

Subtract table length (in inches) from cloth length (e.g.  $132" - 72" = 60"$ )

Divide that number by 2 ( $60" / 2 = 30"$ )

The answer gives you the drop that cloth will have on the ENDS of the table (30")

Next, subtract the table width (in inches) from the cloth width (e.g.  $90" - 30" = 60"$ )

Divide that number by 2 ( $60" / 2 = 30"$ )

The answer gives you the drop that cloth will have on the long SIDES of the table (30")

## Linens for Square Tables

Since we don't carry square table drapes, we recommend using round linens for square tables (see linen sizing chart for appropriate sizes).

The linen will drape with a slight curve since the linen is round.

## Children's Table, 6' Rectangular

10' Banquet goes 15" on sides and 24" on ends.

( $\frac{3}{4}$  drop on sides and floor length on ends – need to tie ends of cloth in a knot so they don't drag)

Overlays not recommended

## Children's Table, 48" Round

90" Round goes 21" down (almost floor length).

Overlays not recommended
